

2024 M1 Concourse Convertible Policy

Any convertible vehicles driven on the Track must have a factory-installed rollover protection system or a roll cage installed. All convertible vehicles are recommended to be driven with the top up. Arm restraints are required for those Members choosing to drive with a convertible top down.

All convertible vehicles must pass the "Height Clearance Test." The driver and passenger (if applicable) must be one inch (1") or more below the roll bar or factory protection system with their helmet on. If this requirement is not met, the vehicle is prohibited from on-track activities.

The following list contains vehicles known to have factory-installed rollover protection. M1 Concourse does not guarantee its accuracy and it is the full responsibility of the driver to ensure their convertible has a rollover protection system or a roll cage installed.

List of vehicles known to have factory rollover protection:

- Aston Martin 1998-present
- Audi TT, A4, S4, A5, S5 & R8
- Bentley Continental
- BMW Z4 & Z3, 3 series, 6 series, M series 1998-present
